Work experience

1. Software Developer(Asp.net MVC, Java)
Feb 2018 - till date

EQL Business Solution(Pune)

Role and Responsibities :

- Translate application storyboards and use cases into functional applications
- Design, build, and maintain efficient, reusable, and reliable code
- Integrate data storage solutions
- Ensure the best possible performance, quality, and responsiveness of applications
- Identify bottlenecks and bugs, and devise solutions to mitigate and address these issues
- Analyzing and gathering requirements for the framework and creating a design for the final software output.
- Developing the web based software using computer programming languages such as C#.net, C# and MSSQL.
- Performing extensive software testing and stringent quality checks as per the QC guidelines to ensure an error free as well as optimum final product to the user.
- Creating and maintaining the ASP.NET based websites and their web applications as per the initial guidelines of the client.

Major Projects:

DMS(Running)

Summary:

Power PDF Advanced displays a ribbon group for each detected and supported Document Management System (DMS) that was enabled during a custom install or added later by restarting the installer and clicking Change. These let you open PDF files from the DMS and save them back. PDF Pages can be inserted or extracted. Files of any type can be opened from the DMS to become attachments to the current PDF document. This functionality can also be accessed via the Connectors ribbon, which lists Cloud Storage Sites plus all detected DM systems.

Power PDF Advanced (and its components PDF Create and PDF Convert) support Microsoft SharePoint through dialog boxes included in the program. All other Document Management Systems (DMS) are accessed through their own interfaces.

The DMS support extends to several systems as detailed in System Requirements . All supported DM systems, including SharePoint, have the ability to open not just PDF files, but a wide range of file types from the DMS and have them converted to PDF in the background using existing settings and displayed in Power PDF.

Power PDF Advanced:
- open and save PDF files from and to DMS.
- open non-PDF files from DMS with background conversion to PDF.
- insert pages from or extract pages to a DMS.
- attach files of any type from DMS to the current PDF.

2. Software Developer(Asp.Net MVC, Java)
June 2016 - Dec 2017

Ammco Infotech(Navi Mumbai)

Role and Responsibities :

- Translate application storyboards and use cases into functional applications
- Design, build, and maintain efficient, reusable, and reliable code
- Integrate data storage solutions
- Ensure the best possible performance, quality, and responsiveness of applications
- Identify bottlenecks and bugs, and devise solutions to mitigate and address these issues
- Analyzing and gathering requirements for the framework and creating a design for the final software output.
- Developing the web based software using computer programming languages such as C#.net, C# and MSSQL.
- Performing extensive software testing and stringent quality checks as per the QC guidelines to ensure an error free as well as optimum final product to the user.
- Creating and maintaining the ASP.NET based websites and their web applications as per the initial guidelines of the client.
- Making changes to existing web applications according to the feedback received from the end users or clients. In some cases, changes are also made in order to update the application's compatibility with the latest operating systems.

Major Projects:

MLM (GCC WALLET, O3shopping.org)

MLM Software (Back End)

Summary:

A multilevel marketing project is a system that allows companies to make and implement their MLM strategies for education tutorials online. Users may first register on website. As soon as a new member registers he needs to pay a fee. On paying fees he becomes a member and can view online education tutorials and download educational e-books and he may now refer other members. When these members register on website for form filling they can select the person who referred them.

Advantages:

- Companies don't have to hire a full time salesperson for their product promotion.
- The system helps companies to save money and resources spent on advertising.
- Customers are more willing to buy the product from a friend thus helps company to get loyal customers.
- This strategy can help company to reach out to a lot of customers.

Project Flow:

- Admin Module: Admin can do the direct registration, View the registration of user, Admin can assign Package to the user Admin can transfer the payment to any user.
- User Module: User can view Products, they can purchase the product. After purchasing product joining will be done, they can view their Tree structure or genelogy
- Back Office: User can raise any Ticket(Complaint), user get resolved ticket, user can view all history of his ticket, User can Search his ticket using any keyword which is used in table.

Skills

Java

Core Java, Advanced Java, Servlet, Jsp, JDBC, Spring MVC, Hibernate, Struts

Asp.Net MVC

C#.NET

OOPS Concepts, Generics, Collections, Threading, Multithreading

ASP.NET

Controllers, Validation, Good in UI

HTML, CSS

Good in UI

PostgreSQL

DDL, DML, View, Trigger, Subquery, Joins,

SQL Server

DDL,DML, Store Procedures, Join, Triggers

Education

Course: BE(CSE)   2011 - 2015

Institute: Shri Vitthal Education and Research Institute, Pandharpur

Exam	Year	Board	Percentage	Institute
S.S.C	March 2009	Maharashtra state	82.15%	Shri Vimaleshwar Vidyalaya, Bemble
H.S.C	March 2011	Maharashtra state	64.83%	D.B.F. Dyanand college of Solapur, Solapur
BE. (CSE)	Nov 2015	Solpaur University	62.33%	Shri Vithal Education and Research Institute, Pandharpur

Documents held

1.Passport

2.PanCard

Certifications

1. Dot Net

2. Java

Project in Academic

Towards Differential Query Services in Cost-Efficient Clouds   July 2014 - May 2015

Abstract

Cloud computing as an emerging technology trend is expected to reshape the advances in information technology. In a cost-efficient cloud environment, a user can tolerate a certain degree of delay while retrieving information from the cloud to reduce costs. In this paper, we address two fundamental issues in such an environment: privacy and efficiency.

Used Scheme:
- The EIRQ-Efficient Scheme
- The Ostrovsky Scheme
